# But first...

- Why the Power Platform?
  - ✓ High developer demand.
  - ✓ Democratize technology.
  - ✓ Quicker ROI.
  - ✓ Modernize solutions.

# Understanding automation

□ What are Triggers?

# Understanding automation

□ What are Actions?

The image shows a 'Initialize variable' block from a low-code development platform. The block has a purple header with a variable icon '{x}' and the text 'Initialize variable'. Below the header, there are three input fields: 'Name' with the placeholder 'Enter variable name', 'Type' with a dropdown menu showing 'String', and 'Value' with a function call 'concat(...)' and a close button 'x'.

Initialize variable	
* Name	Enter variable name
* Type	String
Value	concat(...) x
